

GreenTip

How Do You Measure Up?

Green Fun and Games for Earth Day!

Earth Day is April 22, so this week we're all thinking about what we can do to help protect our environment and be **green**. Making a **green** effort is a wonderful way to support our neighborhoods and our community. Why not have some good, **green** fun while you learn more about our planet and how to keep it **clean and green**?

Where Do I Start?

There are tons of green activities out there that will help you have fun while you celebrate Earth Day. For earth-friendly games that you can play by yourself or with friends, check out this great website created just for kids by Simon & Schuster, a company that publishes school textbooks and children's books:

<http://simonlittlegreen.com/index.php>

You can post your own comments and questions on the "Little Green Blog," and read comments and replies from others. Also, take a look at the list of "Little Green Books" that are all about our environment and are even made from 100% recycled materials.

What Else is Out There?

For other fun green activities, including craft projects, word games and coloring books you can download, check out the Recycle Guys website, presented by the North Carolina Division of Pollution Prevention and Environmental Assistance:

<http://www.p2pays.org/recycleguys/>

You can watch Recycle Guys videos, order Recycle Guys trading cards, play Recycle Guys bingo and even print out your own Recycle Guys iron-on transfer for tee shirts.

What Can I Do to Help?

If you want to take action and help your family, your school and your community become more earth-friendly, check out this kid's website from Keep America Beautiful
